Summary

Full-Stack Web Developer with a focus in responsive front-end UI and a passion for constant learning. As a developer, I strive to connect people to the world around them in a fast and intuitive way, allowing companies to reach their user base in an engaging manner, and enabling users to take full advantage of modern technology.

Education

University of Denver Full-Stack Coding Bootcamp | *Certificate of Completion*
DU Coding Bootcamp provides an intensive curriculum designed to prepare talented software developers for roles in the tech industry upon immediate completion of the course.

Technical Skills

HTML5 | CSS | Materialize | Javascript | React | JQuery | Node.js | Express | Express-Handlebars | JawsDB | AWS MySQL | Sequelize | MongoDB | Mongoose | GitHub | Postman | Heroku | Agile Methodology | Visual Studio Code

Projects

Book Finder
https://waterylime.github.io/Book-Finder/
- HTML5, CSS, Bulma, Javascript, JQuery
- An application utilizing the Google Books API to recommend books to users based on user-side input

---

Whiskey Journal
http://whiskey-journal.herokuapp.com/
- HTML5, CSS, Bulma, Javascript, JQuery, Express, Handlebars, MySQL, Sequelize, JawsDB, Heroku
- A CRUD application allowing users to track whiskeys they've tasted via form input utilizing a Bulma based user interface that passes data into a MySQL database

---

Burger-App
https://kyle-burger-app.herokuapp.com/
- HTML5, CSS, Bootstrap, Bootswatch, Javascript, JQuery, Express, Express-Handlebars, MVC Framework
- A simple CRUD application that allows a user to create a burger that will dynamically populate in the viewport and change columns based on click events

Experience

Freelance Musician | *2014 – present*
- Upright Bass, Electric Bass, Tuba, Guitar
- Contracted musician for studio recordings, bluegrass, jazz, rock, and event bands, as well as regional musical theater pit orchestras throughout the country.
